DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation

Art Unit: 1751

under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 11 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP (105556) or DE (4224947).

EP '556 disclose an aqueous cleaning agent for cleaning kitchenware and other hard surfaces, said agent containing an anionic surfactant such as alkyl sulfate; an ethoxylated nonionic surfactant of an aliphatic alcohol; an alkyl polysaccharide such as alkyl polyglucoside; another nonionic surfactant; and a surfactant builder such as phosphates and carbonates. (see claim 5, pg. 10-pg. 11).

DE '947 disclose a washing agent containing an enzyme, synthetic sulfate or sulfonate anionic surfactants (pg. 2, lines 63-66); nonionic surfactants such as alkyl polyglycoside or alkyoxylates and builder substances. Note, see claims 3 and 4.

As these references teach all of the instantly required it is considered anticipatory.

6. Claims 11-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over DE (19719606) in view of DE (105556).

DE '606 discloses a cleaning formulation comprising an alkyl or alkenyl sulfate; an alcohol polyethylene glycol ether; alkyl or alkenyl phosphates and electrolyte salts for simultaneously cleaning and antistatic finishing of coated metal surfaces.

DE '606 lacks a teaching of an alkyl oligoglycoside.

Art Unit: 1751

DE '556 is relied upon as set forth above. Specifically, DE '556 teaches that alkyl oligoglycoside are used in for cleaning metal surfaces.

It would have been obvious to one of ordinary skill in the art to substitute the alkyl phosphates of DE '606 for the alkyl oligoglycoside of DE '556 because DE '556 teach that oligoglycoside reduce the traces after rinsing and DE '606 teach that alkyl phosphates are used for that same purpose. Therefore, one of ordinary skill in the art would have been motivated to substitute said components because only similar results would have been obtained in the absence of a showing to the contrary.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Necholas Ogden whose telephone number is 703-308-3732. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Yogendra N. Gupta can be reached on 703-308-4708. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9310 for regular communications and 703-872-9311 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0661.
